Data Sheet

BAYGUARD NO.244
Concrete Salt Protector

Product Description

BAYGUARD is an oligomeric-siloxane based water repellent. It penetrates into concrete and masonry substrate and protects the surfaces against water carrying salts, but still permits the surface to breathe. It is a very thin, clear fluid that requires no waxing or dilution and can be easily sprayed, mopped, brushed or rolled.

Features

- * Provides tenacious non-staining hydrophobic film.
- * Film repels water & protects against de-icing salts, freeze/thaw. *
- Ready to use, spray, mop brush, rolled. *
- Provides deep penetration into substrates of vertical or horizontal surfaces. *
- Allows water vapor transmission. * Non
- "Red Label" product. * Excellent
- protection against algae and moss growth.

Specifications

- * Combustible liquid, not "Red Label". Flash point greater than 110 F (COC)
- * VOC 750 g/l.
- * Complies with Series II NCHRP (244 Report).
- * Active Solids Content 10 %.

Application Instructions

- * Apply thin film with sprayer, brush, mop, or roller.
- * Surface should be free from oil, dirt, dust, moss and algae.
- * Vertical surfaces apply two coats at five minute intervals.
- * Horizontal surfaces apply one coat, brush out puddles.
- * Provide adequate ventilation, keep away from sparks or open flame.
- * Refer to MSDS for further information

Packaging

- * 5-Gallon Pails
- * 55-Gallon Drums
- * 275-Gallon Bulk Drums
